

E-Link: Bringing eCommerce Data into Sage

E-Link forms a deep integration that synchronizes your eCommerce data and functionality with Sage ERP. It manages all data connection points for Customer Portals and B2B/B2C eCommerce.

Compatible with **Sage 100, 300, 500, X3, and Intacct.**

Connection Points

- ▶ Products
- ▶ Pricing
- ▶ Inventory
- ▶ Customer Information
- ▶ Order History
- ▶ Transactions
- ▶ Payments
- ▶ Shipping & Tracking
- ▶ And More ...

Architecture, Design & Support

We provide end-to-end services, including design and website architecture. With our E-Link Sage ERP integration, you can seamlessly synchronize your inventory, orders, customer information, and shipping details between your core systems. This eliminates the need for batch processing or manual order management, and allows both platforms to operate on near real-time data.

See what a team of certified Sage and eCommerce integration professionals can do for your business.

Sage, eCommerce, Connected.
